Drew

I'm attaching DEQ's response on the Shoreline Completion Report along with comments from EPA. Overall, this is a great report and reflects completion of a significant milestone for source control at this site. Thanks for all your efforts to meet the challenges associated with this action and getting it done. I'm working on a No Further Action for shoreline source control determination. A memo supporting this determination will be circulated shortly. Feel free to call if you have any questions and let me know if you'd also like a hard copy of attached mailed.

Thanks!

Jennifer Sutter
